PROFILE

Master's student in Computer Science at the University of St. Gallen with a strong foundation in information technologies and data science. Practical experience in data analysis, IT systems support, and infrastructure-related technical documentation, including work with Python, R, and C++ for data processing, machine learning, and systems-level programming. Experienced in coordinating operational processes in dynamic environments, including large-scale international events.

EDUCATION

University of St. Gallen (HSG), St. Gallen, Switzerland - M.Sc. in Computer Science
09/2025 – 06/2027

Focus areas: Data Science, Machine Learning, Systems Engineering

- Strong interest in financial data analysis, corporate finance, and applied AI

Azerbaijan University of Architecture and Construction, Baku, Azerbaijan - B.Sc. in Information Technologies
09/2021 – 07/2025

Overall Grade: 73.86/100 (Azerbaijani grading system)

- Core coursework: Programming, Algorithms, Databases, Information Systems
- Practical focus on data processing and technical systems support

EXPERIENCE

SOCAR Trading, Geneva, Switzerland - Trading IT Intern
07/2026 – 09/2026

- Automated the allocation process using SQL, replacing a manual workflow with a streamlined, repeatable solution
- Supporting the Paper desk in preparing executive summaries of trading positions and performance
- Gained hands-on exposure to trading systems, market data, and the operational workflow of a physical/paper trading business

“Azerdovletlayihe” State General Design Institute, Baku, Azerbaijan - Production Intern
02/2025 – 06/2025

- Collected, cleaned, and structured geographical and demographic datasets for infrastructure and city planning projects
- Applied data preprocessing techniques to ensure consistency and accuracy across multiple data sources.

-
- Gained practical experience in data validation, dataset organization, and analytical reporting workflows

Sami Yusuf Concert Tour (Astana Music), Turkey · Jordan · UAE – Artist Liaison

2024 – 2025

- Supported coordination of international concert events across multiple countries
- Acted as a communication link between teams, including real-time translation (Turkish–Azerbaijani–English)
- Coordinated schedules and daily logistics for large groups of performers (up to 60 people).

AIC Valve Engineering LLC, Baku, Azerbaijan - Junior IT Specialist

09/2023 – 11/2024

- Performed system troubleshooting and technical diagnostics across internal IT infrastructure
- Assisted in system deployment, configuration, and documentation of new software and hardware environments

Formula 1 Azerbaijan Grand Prix, Baku, Azerbaijan- Server (Seasonal Position)

06/2022 – 04/2023

- Operated in a high-pressure, fast-paced international event environment

SELECTED ACADEMIC PROJECTS

PikoGPT Challenge – Large Language Model Development

University of St. Gallen | 2026 – Present

- Building a transformer-based LLM in a team of four students
- Gaining hands-on experience in deep learning, optimization, and model benchmarking

ASSE Plugtest – Distributed Software System

University of St. Gallen | 2025

- Developed a distributed software system using a modern technology stack in a semester-long team project
- Applied architectural patterns and software engineering best practices to design, build, test, and deploy services

LANGUAGES

Azerbaijani (Native), English (C1), Turkish (C1), Russian (B1)

VOLUNTEERING

Start Global Hackathon, St. Gallen, Switzerland — Event Manager (Volunteer)

03/2026

- Coordinated logistics and operations for an international hackathon with 600+ participants
